WRITTEN OPINION

International application No.

PCT/US02/19401

I.	Basis of the opinion
1.	With regard to the elements of the international application:*
	the international application as originally filed the description: pages 1-85, as originally filed pages NONE, filed with the demand pages NONE, filed with the letter of
	the claims: pages 86-94, as originally filed pages NONE, as amended (together with any statement) under Article 19 pages NONE, filed with the demand pages NONE, filed with the letter of
	the drawings: pages 1-44
	pages NONE , as originally filed pages NONE , filed with the demand pages NONE , filed with the letter of
2.	With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is: the language of a translation furnished for the purposes of international search (under Rule23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination(under Rules 55.2 and/or 55.3).
	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in written form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished. The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.
 5. 	The amendments have resulted in the cancellation of: the description, pages NONE the claims, Nos. NONE the drawings, sheets/fig 1-44 This opinion has been drawn as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
* thi	Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in is opinion as "originally filed."

WRITTEN OPINION

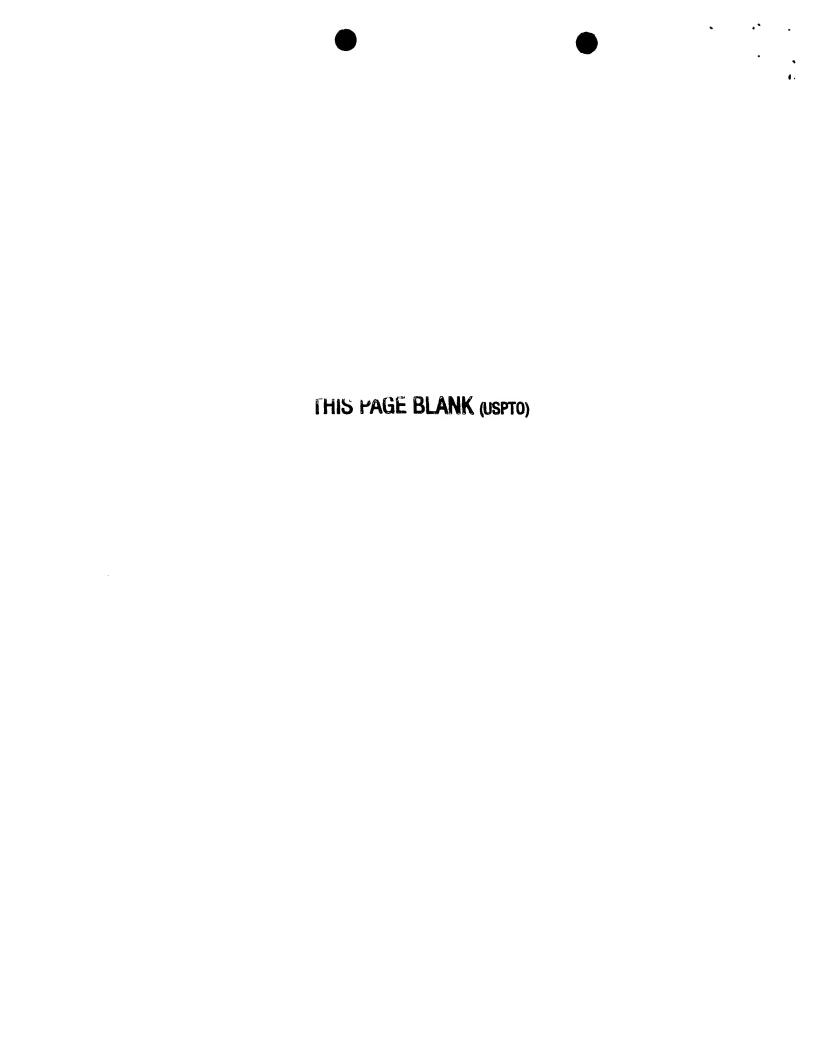

International application No. PCT/US02/19401

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1. STATEMENT					
Novelty (N)	Claims	1-29	YES		
	Claims	NONE	NO		
Inventive Step (IS)	Claims	NONE	YES		
	Claims	1-29	NO		
Industrial Applicability (IA)	Claims	1-29	YES		
	Claims	NONE	NO		

2. CITATIONS AND EXPLANATIONS

Claims 1, 10, 18, 21 lacks inventive step under PCT Article 33(3) as being obvious over Ferrel et al (US patent 5,907,837). Ferrel teaches as an example, users of Multimedia Publishing System (MPS) titles are able to search within title content for items that match a text expression (see at Fig. 22, col. 39-43). Thus, it would have been obvious to one ordinarily skilled in the art at the time of invention to provide a search center pan with search category from a drop down list of search categories.

Claims 2-9, 11-17, 19-20, 22-29 lacks inventive step under PCT Article 33(3) as being obvious over Ferrel et al (US patent 5,907,837) and in view of Beck et al (6,167,395). Ferrel does not teach association criteria. However, Beck teaches a search function that searches accessed data for association criteria (col. 4, line 59 to col. 5, line 29). Thus, it would have been obvious to one ordinarily skilled in the art at the time of invention to provide a search function for associated criteria. It is essential to search internet databases for associated criteria data rather than searching simply using keywords.
